

Connectors are designed to provide a secure and reliable connection between the user and the other components of a system fall protection. Each of them must be designed, manufactured, installed and used according to current regulations and in accordance with the manufacturer's instructions.

---

## Maintenance, cleaning and storage

Clean with a damp cloth if necessary. Cleaning is recommended to be routine to prevent any persistent accumulation of dirt. Maintenance, cleaning and storage

## Inspection

Check before each use. Always check your equipment before and after you work for damage, deterioration or malfunction. Additionally, carry out an inspection plan with personnel qualified. A written and/or electronic record of each inspection must be kept on file.

Mechanismo	Material:	Weight:	Opening:	Minimum load:	Norm:
Two-step auto lock	Forged steel	215 g / 7.7 oz	1.2 cm / 0.47"	22.3 kN / 5000 lbs	ANSI Z359.1 EN 362:2004
